

## Invitation to course providers: develop a short microsystems awareness course for industry!

EuroTraining invites course providers to elaborate a short course in MST corresponding to the needs of industry. The course will be included in the course directory on the EuroTraining website [eurotraining.net](http://eurotraining.net) and will be promoted to industrial companies and universities by regular e-mail announcements.

According to the investigations of EuroTraining, the training needs of industry could be covered with a course presenting following characteristics:

Target group:

R&D managers and engineers, business development managers and a wide range of R&D staff from companies and institutes involved in the development and production of microdevices.

Course content:

- Overview of the most important MEMs markets and cost analysis
- Overview of specific MEMs technologies
- Description of MEMs design flow
- Introduction to new MEMs technologies
- Hands-on exercises in clean rooms during ½ day

Course duration: 2 days

Course language : English

**-> If you are interested in proposing a course, please mail a short course description (objectives, target group, content, duration, tutors, registration fees) to: Annette Locher, [locher@fsrm.ch](mailto:locher@fsrm.ch) (EuroTraining partner FSRM, Switzerland)**
